Erosion and Sediment Control Field Manual

Best Management Practices (BMPs) for construction site planning and management, erosion and sediment control, pollution prevention, and sampling guidelines. Descriptions of BMPs are concise and include full-color graphics and installation information including guidelines, timing and limitations. Also includes the new Phase II regulations, the State Board sampling and monitoring guidelines, and long-term maintenance information. Recommended by the San Francisco Bay Regional Water Quality Control Board, the Home Builders Association of Northern California and the Engineering Contractors Association. (Revised 2002)

San Francisco Bay Regional Water Quality Control Board (148 pages, full-color) \$30.00

Guidelines for SWPPP Preparation

Incorporates the statewide NPDES General Permit for Construction Activities, including California State stormwater regulations and responsibilities, a guide to the State Water Resources Control Board, step-by-step instructions on how to prepare a Storm Water Pollution Prevention Plan and a Notice of Intent (NOI) to comply with that plan, 404 Permit and 401 Water Quality Certification requirements, and Waste Discharge Requirements. (Revised 2003)

San Francisco Bay Regional Water Quality Control Board (130 pages, two-color) \$12.00

Workshops

With technical assistance provided by the San Francisco Bay Regional Water Quality Control Board, the San Francisco Estuary Project annually conducts a series of one-day workshops throughout the Bay Area for developers, contractors, engineers, public agency staff and interested parties. Workshop presentations summarize state and federal regulations, the roles and responsibilities of those involved in the development process and acceptable BMPs for preventing polluted runoff from construction sites. Each workshop includes a site visit to an active construction site and demonstrations of proper BMP installation procedures. Workshops satisfy training requirements of the State NPDES Construction Permit. For more information, call (510) 622-2465.

VIDEOS and CDs

Video: "Hold on to Your Dirt"

BMPs for grading projects and for stabilizing disturbed land areas. "Hold on to Your Dirt" describes the environmental impacts of uncontrolled erosion from construction projects, documents proper installations of the most commonly used control practices, and contains lively interviews with site managers, contractors, builders and government staff. Winner of the Silver Apple, 1998 (National Educational Media Network). Available in Spanish and English. (Revised 2002)

(20 minutes)

Video or CD: "Keep it Clean"

Picks up where "Hold on to Your Dirt" leaves off – after mass grading and site stabilization. The highly effective BMPs recommended in the video are designed to prevent water pollution from construction-related activities, such as painting, stucco, concrete washout facilities and saw-cutting. Also includes the new State sampling modifications. Recipient of the 1998 Award of Distinction (Communicator Awards). Available in Spanish and English. (Revised 2002)

(20 minutes) Video - \$15.00 CD - \$20.00

CD Training Kit:

Simple Tools – Construction Site Planning and Management for Water Quality Protection

This CD Rom is a complete training kit for Construction Site Planning and Management for Compliance with Phase I and II NPDES Requirements. The CD also contains an electronic version of the 1999 edition of the Erosion and Sediment Control Field Manual and the Guidelines for Construction Projects.
